Who are we aiming to approach?

THE HIGHWAY HOSPICE ASSOCIATION

What they do.

“We help **terminally ill patients and their families** by **providing palliative care & support until end of life..**”

At our hospice, we provide compassionate care for individuals facing advanced, incurable terminal illnesses in the final stages of life. Our focus is on **Palliative Care**, which prioritizes the comfort and well-being of the patient rather than solely treating the disease.

Our goal is simple: **to help people feel better**—not just physically, but also emotionally, socially, practically, intellectually, and spiritually. Palliative care begins at

diagnosis, continues alongside treatment, and supports individuals and their families through every stage of their journey, including end-of-life care.

By addressing pain and symptoms while also providing emotional and psychological support, we ensure that patients experience dignity, peace, and the highest possible quality of life.

We provide **Hospice Care**, which is an even more **person-centered approach** to care, offered when curative treatment has stopped. Unlike traditional medicine, which focuses on fighting disease for a cure, hospice care specializes in **comfort, pain management, and symptom control** to ensure dignity and quality of life in a person's final stages.

Both **Palliative Care** and **Hospice Care** share the same goal: to **enhance quality of life** by addressing physical, emotional, and spiritual well-being. While palliative care can be provided alongside treatment, hospice care is focused entirely on comfort and support when treatment is no longer pursued.

Our commitment is to provide compassionate, holistic care, ensuring that individuals and their families receive the support they need during this journey.
