- A description of what they do and their impact on the community:

MFC Care Center is an NPO rehabilitation center for drug addicts. They function by providing professional and medical services to those in need of help and by educating the public about matters related to addiction and the impacts it may have on the lives of individuals and those around them.

They accomplish this by providing alternatives, encouraging their patrons to choose the “lesser of two evils”; encouraging conscious decision making, which will eventually lead to their clients’ independence and confidence in decision making in real world scenarios. In addition to this, they provide a recreational and stimulating environment to show their clients that there are other aspects and ways to live life to the fullest without jeopardizing their health; physical and mental, which is done by giving them access to professional psychologists and community discussions, or daily group conscious meeting as one of their recovery programs which show each individual that they are not alone in their journey to recovery and that there is strength in community. The ideology of ‘together we are stronger’ is emphasized by the opportunity for the public to donate to the institution and volunteer, allowing those that have recovered and experienced the impact of the organization to give back to the community and change the world of another person.

The organization’s beliefs behind establishing a state of rehabilitation include programs such as the 12 step program which prioritizes behavioral changes to uprooting the source of active addiction, recovery Africa which directs clients down a spiritual path to reconnect with god and find their purpose, which is accompanied by the daily spiritual program, the alpha spiritual program and the John Maxwell motivational program, where a pastor and author encourages leadership and initiative.

Apart from providing rehabilitation services, MFC Care Center provides preventative measures such as online seminars and articles that are available to and inform the public about early signs of addiction, which in result, will reduce the average number of addicts and enable efficient recovery processes before severe consequences can be implemented.

In conclusion, MFC Care center is a non-profit organization solely dedicated to changing and saving lives, relationships and potentially families from a lifetime of addiction, giving people a second chance and showing each individual the strength behind their story and in their character and in their ability to break the cycle.
